

To Whom it May COncern:

As a resident of one of the busiest states of our nation, I find it to be very useful to sit in my car and listen to the traffic report within San Diego. Listening in to satellite radio, (which I pay for) allots me more time during my routine mornings. Prior to this service being provided, I had to wait around for the local morning news anchors to quit their unnecessary antics until I was able to listen in on the traffic report. I currently am employed as a delivery driver and also am a full time student who requires accurate and on time daily traffic reports. This ability not only saves me time and money, but it allows me to avoid the traffic messes that can usually be expected in a highly populated state such as California.

Thank you for the time. I am sure that other XM Radio listeners and clients would not appreciate the government trying to walk all over one of our most fundamental rights as Americans. The 1st Amendment.
